Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1732

1.Applicant's election of Species A in the reply filed on March 14, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al (see col. 6, line 28 and col. 7, line 4) in view of Mikami et al essentially for reasons of record noting the following.

Suzuki et al teaches using a trifluoroethyl methacrylate—see col. 7, line 4—and such is submitted as rendering the instant tetrafluoropropyl methacrylate as obvious thereover. Also, see col. 6, line 28 for a disclosure of an epoxy monomer.

3.Applicant's arguments filed December 6, 2006 have been fully considered but they are not persuasive. Applicant's arguments concerning claims 13 and 19-23 are persuasive and these claims are hereby either objected to or allowed, respectively, since the prior art does not disclose or suggest the aspects set forth in these claims of using a splitter. However, the remaining claims are rejected for reasons of record. The exact fluororesin used is submitted to have been within the skill level of the art given the disclosure in Suzuki et al. Chandross et al has been dropped from the rejection as being cumulative with respect to Suzuki et al.
